Greetings Friends & Team,

This document contains information regarding the branding strategy of Gagamba UAS for 2026. Details will outline the brand purpose, mission, vision, values, messaging, identity, guidelines, and application. All parts allow Gagamba to differentiate its value and resources from competitors, build trust and loyalty with its audience, and accomplish achievements.

This document does not include details on the collaboration of other businesses nor insight into other departments and their operations within Gagamba. It only contains the internal and external components of branding and related activities. Please use this document to ensure consistency and maintain brand accuracy across digital and physical platforms to represent the brand with confidence, clarity, and appropriateness.

Thank you.

Our Story

Gagamba UAS, also known as Gagamba, is building a clearer, more advanced future with drone technology. We engineer solutions that go beyond the machine itself, transforming complex operations into safer, more efficient, and autonomous systems.

We believe technology should do more than perform tasks. It should pave a way towards confidence, new possibilities, and elevate the way the world operates for humans. By bringing greater clarity to security, technology, and strategy, Gagamba is helping build a future where progress is not only possible; it is undeniable.

The answer is clear.

UNOFFICIAL UNOFFICIAL

Concept

Inspired by crystals and spiders, Gagamba UAS transformed what it means for a drone company to be trustworthy, yet innovative. Drone companies often present powerful technologies through strength, speed, adaptability, or durability to gain trust with their audiences, but Gagamba UAS wants to express trustworthiness through clarity of strategy for their audiences: lower cost, human connection, materials, autonomy, environmental consciousness, etc.

“Gagamba,” translated to “spider” in Tagalog, can create difficulties in trust visually and metaphorically due to the relationship to spiders. Gagamba UAS strays away from that path by focusing on a specific element of spiders: their webbing. We ask the question: what makes spider webbing feel trustworthy? We discovered that spidroins, the main protein component in spider silk, have crystalline structures within them that make webbing flexible, durable, and strong; spiders trust these webbings to do various activities such as capture prey, mobility, and create homes.

Gagamba UAS is more than drones. We are the only drone company that strategically improves our clients’ business through automation and human quality of life

UNOFFICIAL UNOFFICIAL

UNOFFICIAL
UNOFFICIAL

Core

This section states the following: purpose, mission, vision, and values. These ideals define why the company exist, how goals are accomplished, where they want to be in the future, and who / what they seek.

The Foundation [Core]

UNOFFICIAL

PURPOSE

With drones, we enhance human quality of life by maintaining, inspecting, and improving the spaces around us, the world.

MISSION

To innovate and improve lives in every space with drone technology.

VISION

To bring a more comfortable life to humans.

VALUES

Ambition / Integrity / Innovation / Positivity / Teamwork / Improvement

UNOFFICIAL

UNOFFICIAL

Messaging

This section outlines how the company sounds to its audience. This will include the brand's mood, personality, voice, tone, value proposition, and tagline.

Mood [Messaging]

UNOFFICIAL
UNOFFICIAL

Personality [Messaging]

UNOFFICIAL
UNOFFICIAL

Progress begins with clarity. At Gagamba, we believe meaningful innovation is created by seeing beyond what exists and designing what comes next. Through engineering, we transform complexity into possibility, ideas into action, and bold visions into solutions that move the world forward.

Beyond drones, we bring overlooked opportunities into the light, reimagine challenges through a different lens, and design clearer paths clearer paths toward meaningful solutions. By transforming uncertainty into insight and insight into invention, Gagamba is a creator of a future where progress is not simply envisioned, it is built and made real.

The Jester

At Gagamba, not every answer surrounds the advancement of technology. Sometimes, the answers begins with curiosity, optimism, and through a simple question: why not look at things differently? We believe meaningful innovations stems from challenging what's normal, finding possibility where others see limitations, and bringing overlooked opportunities into the light.

We approach the world with hopeful eyes and inquisitive minds, always searching for clearer paths forward. Our curiosity fuels our ambition, and our perspective shapes the solutions we create. We don't believe progress has to follow the expected route. Sometimes, the best ideas come from looking again, thinking differently, and having a little fun along the way. By turning insight into action and possibility into reality, Gagamba creates solutions designed not just for today, but for a brighter future.

Voice [Messaging]

UNOFFICIAL
UNOFFICIAL
UNOFFICIAL

The Creator

Goal:

To solve the issues of our clients/audience through the innovation of ideas and product.

Key Words:

Innovation
Opportunity
Professional
Knowledgeable
Trustworthy
Problem-Solver

The Jester

Goal:

To view each issue or scenario in a different way that leads to humanitarian and/or innovative actions.

Key Words:

Imagination
Compassion
Approachable
Different Perspective
Optimism
Comfortability

Tone [Messaging]

When presenting and speaking to clients and the general public, the Gagamba UAS marketing and branding team must commit to these standards at the bottom to maintain brand image and recognition. Despite this, the tone will adapt to context, shifting based on platform, audience, or situation.

Optimistic	Knowledgeable	Approachable	Imaginative
Professional	Trustworthy	Fresh	Compassion

UNOFFICIAL
UNOFFICIAL
UNOFFICIAL

Tagline [Messaging]

As of 2026, Gagamba operates in the window-cleaning and drone industry. This tagline reflects the company humorously by reflecting on its services and results simply and directly. This simplicity connects back to the brand's identity and clarity, helping maintain brand recognition.

The Answer is Clear.

UNOFFICIAL
UNOFFICIAL
UNOFFICIAL

Value Proposition [Messaging]

UNOFFICIAL

Note: As of 2026, below are current advantages that Gagamba has. These advantages can change in the near future due to customer desires.

Cost Efficient

Currently, Gagamba UAS poses an adantage for our clients due to our lower cost offers when their tasks are completed using our products and services.

Autonomy

Gagamba UAS proudly commits to autonomous technology through our products. We want to ensure that difficult and dangerous tasks are completed without risking any human lives. This will result in efficiency and safety.

Humanitarian

All Gagamba UAS products are designed to enhance human quality of life. We engineer our products and services to ensure human lives are not at risk doing dangerous jobs.

Identity

This section displays and describes the visual identity of the company, which includes the following: logos, color palette, typography, and imagery.

UNOFFICIAL UNOFFICIAL

Logo Suite [Identity]

Main Logo

The primary logo is a typographic wordmark created around gagamba in lowercase. The letterforms are intentionally soft and solid with subtle customs details that reference the icon's shape. The wordmark is the main identifier and should be used most often across the brand.

UNOFFICIAL
UNOFFICIAL
UNOFFICIAL

Logo Suite [Identity]

Logo Suite [Identity]

UNOFFICIAL

Logomark / Combination Mark

The icon is pairable with the wordmark to create primary and secondary logos. The combination of these two logos make branding applicable across digital and physical platforms. In addition, the icon can be used separately to identify the brand.

Primary Combination Mark

Secondary Combination Mark

Color Palette [Identity]

UNOFFICIAL
UNOFFICIAL

This is the official and main color palette for Gagamba in 2026. The colors have specialized names that are reflective and cohesive to the brand's concept. The following colors are: violet, indigo, black, and white. It is imperative that the colors ARE NOT to be changed or misused. The only colors that have flexibility towards shade/tone change are black and white, but nonetheless, try to obtain the closest shade to the colors.

Refer to the Brand Guidelines section to see how colors are used.

CLEARLY SAPPHIRE

PANTONE 2368 C
#4D49BE
RGB: 77, 73, 190
CMYK: 80, 78, 0, 0

CLEARLY TANZANITE

PANTONE 273 C
#24125F
RGB: 36, 18, 95
CMYK: 99, 100, 27, 28

CLEARLY ONYX

PANTONE Black 6 C
#101820
RGB: 16, 24, 32
CMYK: 82, 71, 59, 75

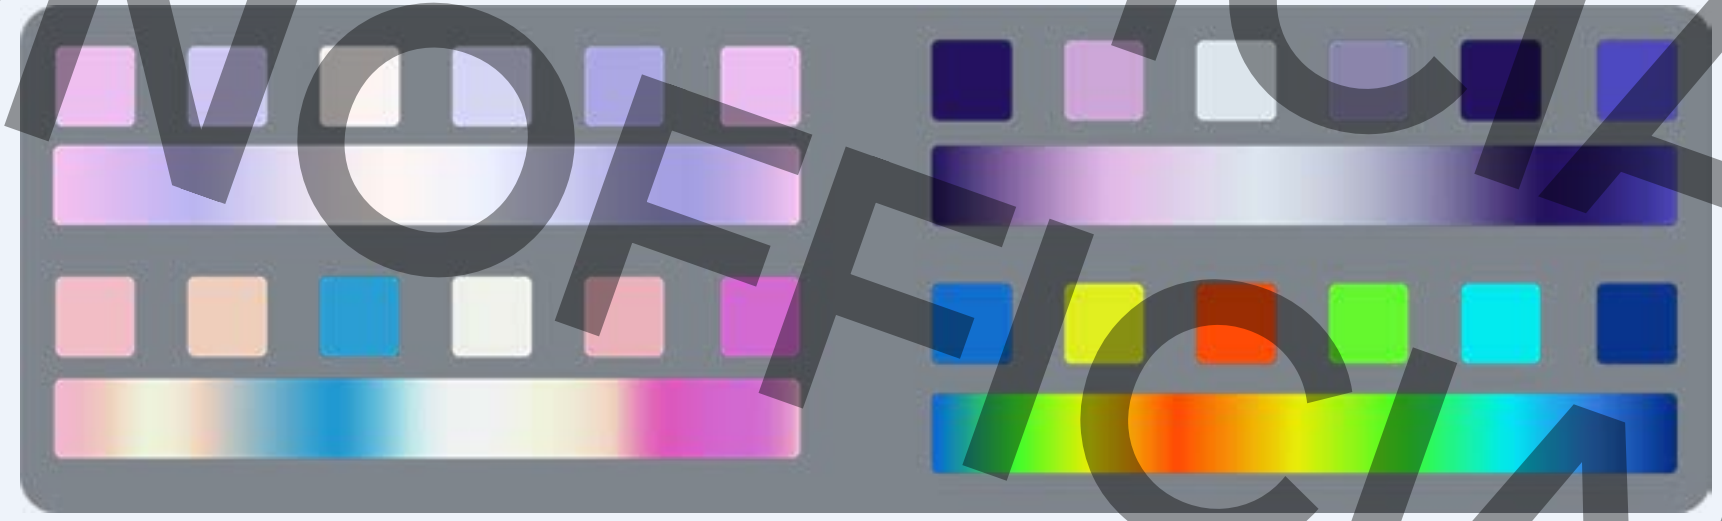

CLEARLY PEARL

PANTONE 656 C
#DDE5ED
RGB: 221, 229, 237
CMYK: 13, 5, 3, 0

Color Palette [Identity]

Alongside the main color palette, Gagamba UAS utilizes iridescent and spectrum colors as accent color palettes. These colors are not meant to be used in abundance. Use these color palettes strategically to enhance visual appeal and communication.

Below are examples of how these color combinations might appear and are not limited to these iridescent and spectrum palettes, but do maintain appropriateness to the design. However, the individual colors within these combinations are not to be used on their own. **Go to Page 20 [Imagery] for reference.**

UNOFFICIAL
UNOFFICIAL

Typography [Identity]

UNOFFICIAL
UNOFFICIAL

Typefaces & Fonts

Each typeface (Heming & Elms Sans) serves a purpose towards the brand. The fonts are the typeface's copy weight. Refer to the next page to view the text hierarchy.

Heming

Type Classification: Display / Sans-Serif

Heming offers a futuristic, expressive, and distinct voice to Gagamba. Its typographic construction introduces personality that contrasts with futuristic technicality, making it appear imaginative and innovative.

It gives contrast to the precision of Elms Sans that feels human and unexpected, but has the structure to bring something new.

Elms Sans

Type Classification: Sans-Serif

Elms Sans provides a clean, contemporary structure that prioritizes legibility and clarity. Its letterforms create a modern, efficient visual language.

While Heming provides Gagamba with an expressive appeal that can feel human, Elms Sans resonates the clarity and confidence needed to balance expressiveness that makes information feel direct, accessible, and precise.

Typography [Identity]

UNOFFICIAL
UNOFFICIAL

This typographic system reflects the brand's core: enhancing clarity for every system.

Clean, optimized typefaces establish unity and precision that makes information feel direct, accessible, and clear.

Headers

Heming Bold / Heming Semi Bold

Headers must be the size of at least 18 points and 10 to 40 EM tracking. The headers must either be Heming Bold or Heming Semi Bold with the first letter uppercased and remain at a larger size than subheaders and body copy.

Subheaders

Heming Semi Bold / Elms Sans Semi Bold

Subheaders must be minimally 12 points in size or 1.618x smaller than the header with 0 to 40 EM tracking. Subheader will be in either Heming Semi Bold or Elms Sans Bold, whichever one fits the content more appropriately. Some requirements include the following: the size underlined above, first letter is uppercased, remain at a larger size than body copy, and remain at a smaller size than headers.

Body Copy

Elms Sans Regular

Body text must be minimally 8 points or 1.618x smaller than the subheaders with 0 to 30 EM tracking. Body text will always remain in Elms Sans Regular or Elms Sans Light to retain legibility and readability; the difference in the usage of these fonts will be dependent on how visible the textual information will appear on certain backgrounds. The body copy must be smaller than headers and subheaders.

Imagery [Identity]

UNOFFICIAL
UNOFFICIAL

Visual 01

Visual 02

Inspired by the concept of crystals,

Gagamba UAS branding features crystalline imagery, iridescent/spectrum gradients, and modern typography alongside the main color palette to convey optimism, futurism, and clarity.

Minimalism is important aspect of the brand and ensures that communication is clear, precise, and intentional. This style must be utilized to create smooth operations between every system, allowing autonomy to be achieved. We use this style to communicate issues and our solutions to those issues. Without minimalism, our communication with clients become unintentional or less emphasized; there will be confusion or redundancy. Make it clear and simple to the audience.

These are examples on how Gagamba promotional advertisements and photography might appear and are unofficial designs of the drone and posters. Please only use as references.

UNOFFICIAL

Guidelines

UNOFFICIAL

This section instructs and demonstrates how brand assets (logos, colors, typography, messaging) should be appropriately used. Follow these instructions strictly; not following these instructions will disrupt brand unity.

Logos [Guidelines]

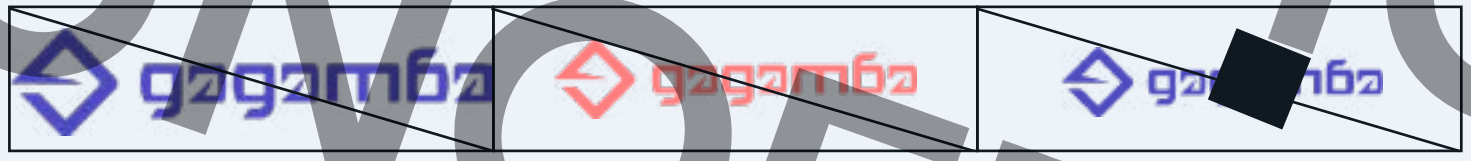

Restrictions

DO NOT use drop-shadows.

DO NOT compress the file size.

DO NOT distort, skew, or rotate.

DO NOT have no clear space.

DO NOT use off-palette colors.

DO NOT obstruct visibility.

DO NOT mix-match colors.

DO NOT apply gradients.

DO NOT add, change, or create a lock-up.

DO NOT crop the logo.

DO NOT imply a relationship, affiliation, or endorsement with another company without legal performission.

DO NOT use on a low-contrast or busy background, where legibility is compromised.

This page highlights the restrictions for logo usage. It is important to follow these rules to maintain brand consistency andidentity. Breaking these restrictions will result in identity disruption, misinterpretation, and legibility.

UNOFFICIAL UNOFFICIAL UNOFFICIAL

Logos [Guidelines]

Acceptances

DO choose colors and backgrounds with high contrast to ensure accessibility.

DO allow ample clear space.

DO get creative for the holidays with customized backgrounds.

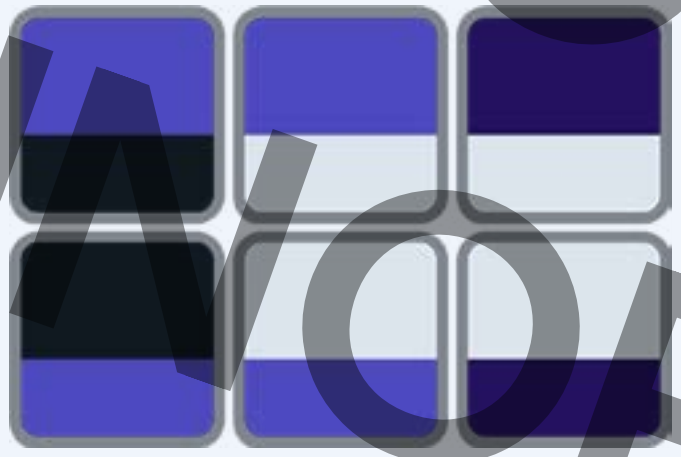

This page highlights what is allowed for logo usage. It is important to follow these rules to maintain brand unity, identity, and legibility. Breaking these rules will cause accessibliity issues and illegibility.

UNOFFICIAL
UNOFFICIAL
UNOFFICIAL

Colors [Guidelines]

UNOFFICIAL UNOFFICIAL

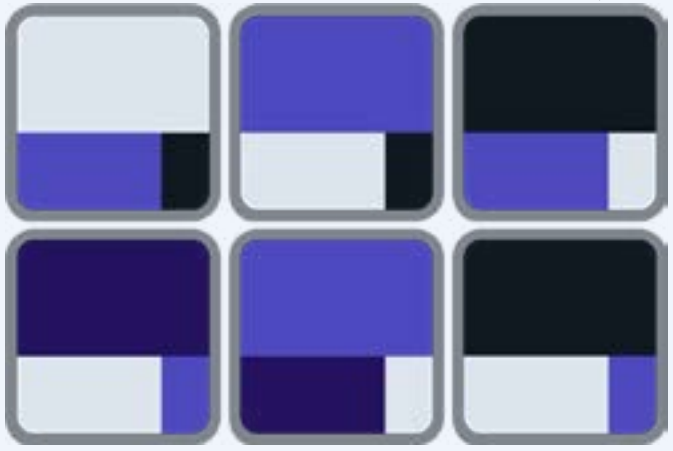

This page provides guidance for proper color usage based off the main color palette. There will be two ratios: (1) 60-40 and (2) 60-30-10. All of these combinations are acceptable. Any other combinations besides the provided in this document will lead to brand disruption, illegibility, and accessibility issues.

(1) 60 - 40

Primary Color: **60%**
Secondary Color: **40%**

Sapphire/Onyx , Sapphire/Pearl , Tanzanite/Pearl
Onyx/Sapphire , Pearl/Sapphire , Pearl/Tanzanite

(2) 60 - 30 - 10

Primary Color: **60%**
Secondary Color: **30%**
Tertiary Color: **10%**

Pearl/Sapphire/Onyx , Sapphire/Pearl/Onyx , Onyx/Sapphire/Pearl
Tanzanite/Pearl/Sapphire , Sapphire/Tanzanite/Pearl , Onyx/Pearl/Sapphire

Colors [Guidelines]

Alongside the main color palette, Gagamba UAS will feature RGB and iridescent colors to enhance visual appeal and visual communication. Use these secondary palettes strategically.
